

Post Dates and Liquor Pregnancy Scan

Post Dates and Liquor Pregnancy Scan

To include photographs and computerised report

Overview of a Post Dates & Liquor Pregnancy Scan

The purpose of the post dates and liquor pregnancy scan is:

- to determine the liquor volume surrounding baby
- to determine the lie & presentation of the baby (breech or cephalic)
- to estimate fetal weight
- to determine the location of the placenta

This ultrasound scan is the 40 weeks pregnancy scan or onwards, at our Dublin 2 consultant led clinic.

MFH is conveniently located in Dublin 2 and offers ultrasound for all stages of pregnancy including early pregnancy scans, nuchal scans, anatomy and growth scans.

Merrion Fetal Health is open to all women not just those attending the National Maternity Hospital. To enquire or book an appointment please call (01) 663 5060 or use the Make A Booking link on our website.
